

Global Inequalities in Academic Geopolitics

The field of geopolitics is beset by global inequalities. This data shows results from approximately **11,000** academic articles in **six** academic journals that contribute to the field.

Using the country where each article was produced, there exists a **clear divide** between the number of articles in the Global North and Global South.

The UK & US dominate the Global North numbers.

Canada has more articles than **the entire Global South**

231

Avg. No. of Articles for **Global North** countries.

12

Avg. No. of Articles for **Global South** countries.

7398

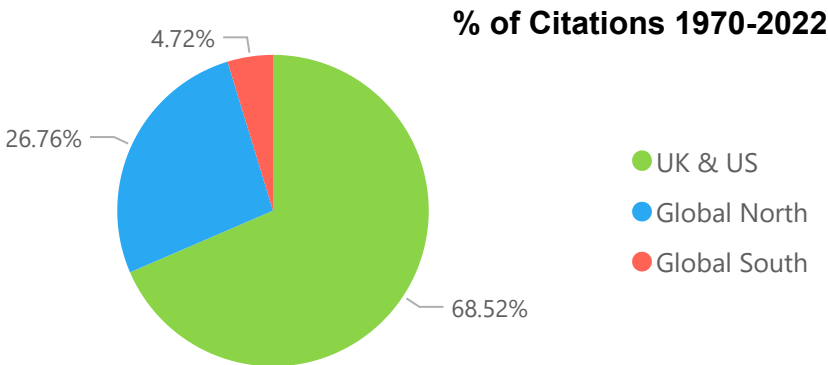

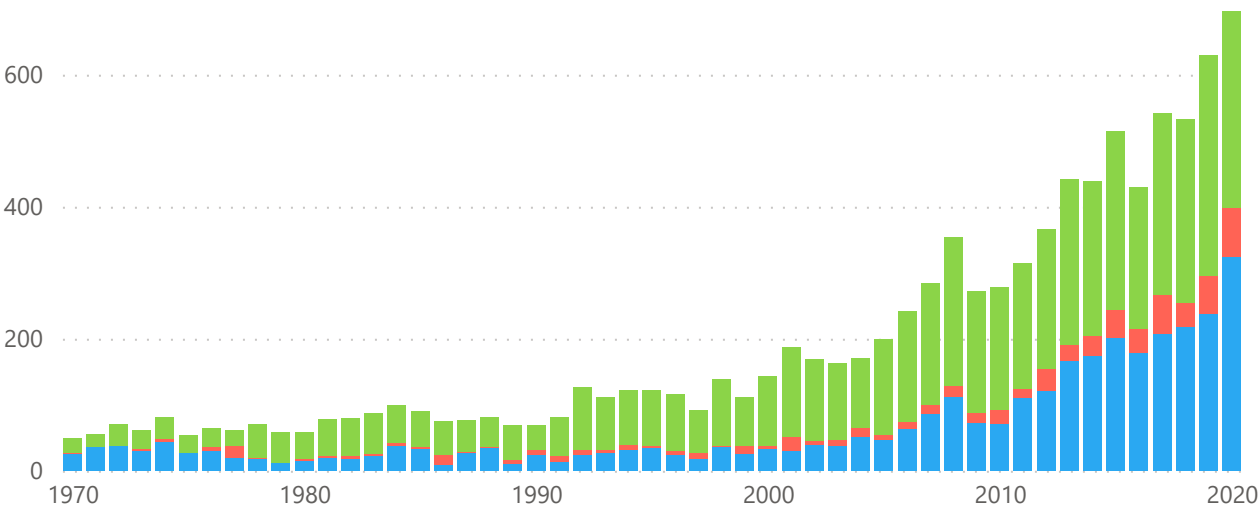

Avg. No. of Citation for **Global North** countries.

248

Avg. No. of Citations for **Global South** countries.

● Global North ● Global South ● UK & US

Share of Articles by Year 1970-2020

Measuring by the total citations for each articles presents a **worse picture**.

This data suggests that the impact of Global South articles is **significantly smaller**.
